What's new at PANHospitality?

Exciting features in our latest version;

@ **Reservation e-mails** can now be sent automatically
@ **Standardised e-mail notes** can be set-up
@ When an e-mail is generated it automatically creates a **log**
@ Brand new **Reservations Summary Report** has been added
@ **Release Date Feature** for provisional bookings now allows you to set-up your own standardised release date.
@ **Predefined notes** will automatically insert notes within a reservation.
@ **Guest List facility** allows for much more detail related to guests,
@ When adding **extras rates** there is now an option to include estimated arrival and departure times as well as pick up and drop off notes.
@ **Extras TAB** was created to only show extra rates linked to the booking
@ The **Reservations Listing Statistics Reports is** now interactive which means you can double click on a booking to zoom into the booking.   Additional columns have been included e.g. telephone numbers and e-mail addresses.

Upgrades are available at NO extra cost !!

Long Stay - 28 days or longer

A **"long stay"** booking has an immediate VAT implication.   A different rate type has to be set-up e.g. LONG_STAY_SINGLE.   This rate is set-up with a different tax type e.g 10, which is only 8.4 % VAT (60 % of 14%) It can also be set-up to post to a different income account.

The 27th of December is a Public Holiday!

WEB API launched !!

This application allows you to use any **ANDROID, IOS, WINDOWS,** device to access your live PAN database.   You will be able to check your availability, make a basic reservation, view bookings between dates and, view a specific bookings, details.

We are **Siteminder,** pmsExchange - version 2 certified
