

ONE SYSTEM ONE SOLUTION

"KNOW YOUR USER RIGHTS"

By **Natasha Harris**

Did you know PANHospitality has close to 300 individual user rights that can be tailored to each user's access requirements.

This also means PAN can be set-up to give your administrative users full access to all functionalities. This feature should be handled with care and only be made available to your management team.

To take full advantage of the administrative user rights we suggest that you have a user with administrative rights available on each shift.

Our unique user access feature gives you greater control over your users and allows for a more secure way to manage your sensitive data.

PAN support will gladly assist you with suggestions to effectively set-up your user access rights.

GOING PAPERLESS

By **Carl Burger**

Going paperless is an important step for a business that wants to participate in green living. Although having a fully integrated PMS already goes a long way towards being paperless, we at PANHospitality strive to go even further.

We are in the process of developing a mobile solution which will allow you to check-in, and sign indemnity forms on a tablet.

Keep your eye on our social pages for further updates.

HAVE YOU DONE YOUR BACK-UPS?

When last did you do a back-up to an external drive? Is your back-up in place? Unsure ... check now !!!

If you are not sure if your back-up is being done or where to activate this please contact our support office as soon as possible to assist.

"Are you on our latest version 386 yet?"

With our latest version you can expect better functionality on your database. The upgrade allows for more support functions, leading to faster delivery of search queries, report requests etc.

Increase the functionality of your operations, schedule your upgrade with our support team now!
